Maryland Gained 6,800 Jobs and Unemployment Rate Decreased to 6.4% in January

Lowest Unemployment Rate Since Beginning of COVID-19 Pandemic

The U.S. Department of Labor's Bureau of Labor Statistics (BLS) released state jobs and unemployment data. According to the preliminary survey data, Maryland gained 6,800 jobs in January and the unemployment rate decreased to 6.4% – the lowest level since the beginning of the COVID-19 pandemic.

The Professional and Business Services sector experienced the most growth with an increase of 3,100 jobs from the Professional, Scientific, and Technical Services (1,700), Administrative and Support and Waste Management and Remediation Services (1,300), and Management of Companies and Enterprises (100) sectors.

Other sectors that experienced growth include: Financial Activities (1,700); Trade, Transportation, and Utilities (1,300); and Other Services (1,000).

Sectors that experienced declines include: Leisure and Hospitality (3,400); Manufacturing (900); Mining, Logging, and Construction (900); and Education and Health Services (600).

Glossary of Terms

Nonagricultural payroll employment: Employment data referring to persons on establishment payrolls who receive pay for any part of the pay period that includes the 12th of the month. Persons are counted at their place of work rather than at their place of residence; those appearing on more than one payroll are counted on each payroll. Establishments are classified in an industry on the basis of their principal product or activity in accordance with the most recent North American Industry Classification System Manual.

Civilian labor force: All persons 16 years and over in the civilian noninstitutional population classified as either employed or unemployed.

Employed persons: All persons who, during the reference week (the week including the 12th day of the month), (a) did any work as paid employees, worked in their own business or profession or on their own farm, or worked 15 hours or more as unpaid workers in an enterprise operated by a member of their family, or (b) were not working but who had jobs from which they were temporarily absent because of vacation, illness, bad weather, childcare problems, maternity or paternity leave, labor management dispute job training, or other family or personal reasons, whether or not they were paid for the time off or were seeking other jobs. Each employed person is counted only once, even if he or she holds more than one job.

Unemployed persons: All persons who had no employment during the reference week, were available for work, except for temporary illness, and had made specific efforts to find employment some time during the 4-week period ending with the reference week. Persons who were waiting to be recalled to a job from which they had been laid off need not have been looking for work to be classified as unemployed.

Unemployment rate: The ratio of unemployed to the civilian labor force expressed as a percent.

Seasonal adjustment: A statistical technique that eliminates the influences of weather, holidays, the opening and closing of schools, and other recurring seasonal events from economic time series. This permits easier observation and analysis of cyclical, trend, and other nonseasonal movements in the data.
