Maryland Gained 13,100 Jobs in March

Eleventh Consecutive Month of Job Growth

The U.S. Department of Labor's Bureau of Labor Statistics (BLS) released state jobs and unemployment data. According to the preliminary survey data, Maryland gained 13,100 jobs and the unemployment rate remained at 6.2% in March. This is the eleventh consecutive month of job growth in Maryland.

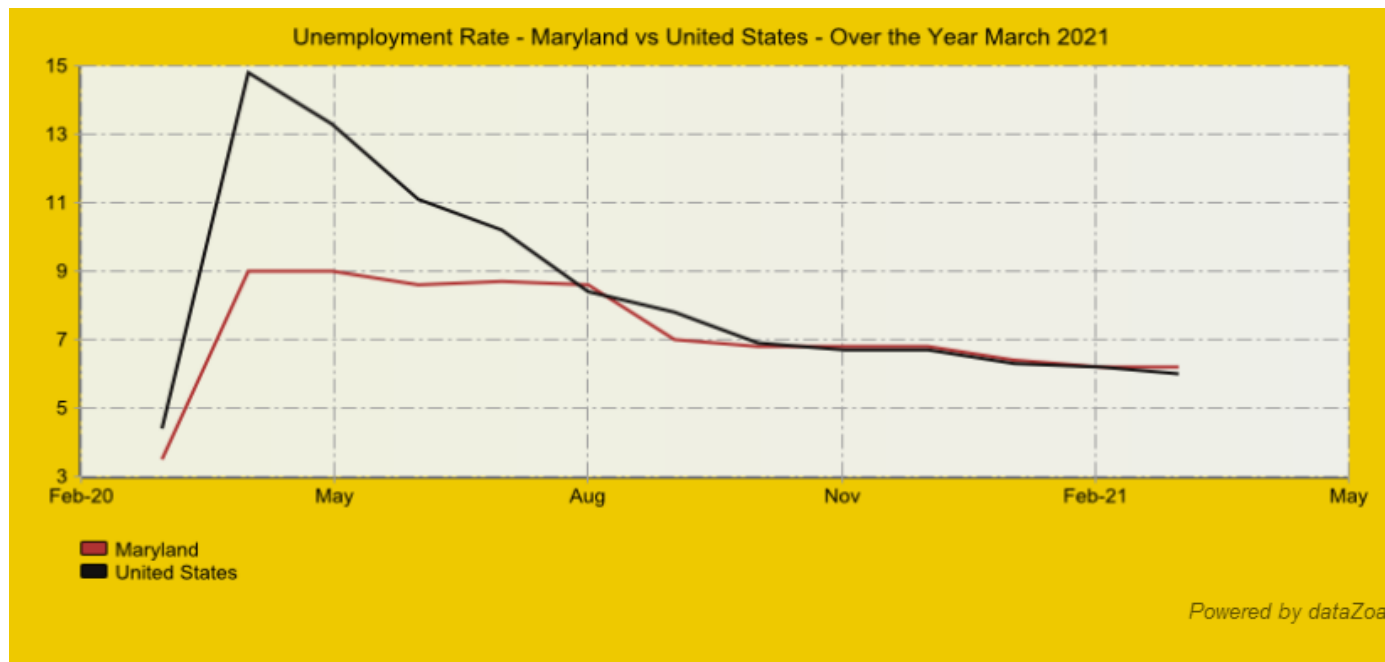

The Professional and Business Services sector experienced the most growth with an increase of 3,200 jobs. Other sectors that experienced growth include: Leisure and Hospitality (2,600); Mining, Logging, and Construction (2,400); Education and Health Services (1,100); Other Services (800); Financial Activities (700); and Manufacturing (600).

Sectors that experienced declines include Trade, Transportation, and Utilities (700) and Information (500).

February's preliminary jobs estimate was revised upwards by 1,900 jobs, from a loss of 700 to a gain of 1,200 jobs. Since the beginning of 2021, Maryland has gained a total of 24,200 jobs.

Maryland Organization Helps People With Disabilities Find Jobs

According to WDVM, recently opened in Mount Airy and established by parents of an autistic adult, The Difference 2-17 is a center for teens and adults with intellectual disabilities.

The organization aims to help participants gain independence and find their passion by introducing a career path to each individual and building connections within the community to help the participants network and find a job.

Georgetown University to Introduce Degree Program for Maryland Inmates

According to The Washington Post, Georgetown University will launch a liberal arts degree program this fall for inmates in Maryland's state prison system. The degree program is an expansion of the university's Prison Scholars Program, which has offered both noncredit and credit-bearing college courses to more than 150 incarcerated students.

Glossary of Terms

Nonagricultural payroll employment: Employment data referring to persons on establishment payrolls who receive pay for any part of the pay period that includes the 12th of the month. Persons are counted at their place of work rather than at their place of residence; those appearing on more than one payroll are counted on each payroll. Establishments are classified in an industry on the basis of their principal product or activity in accordance with the most recent North American Industry Classification System Manual.

Civilian labor force: All persons 16 years and over in the civilian noninstitutional population classified as either employed or unemployed.

Employed persons: All persons who, during the reference week (the week including the 12th day of the month), (a) did any work as paid employees, worked in their own business or profession or on their own farm, or worked 15 hours or more as unpaid workers in an enterprise operated by a member of their family, or (b) were not working but who had jobs from which they were temporarily absent because of vacation, illness, bad weather, childcare problems, maternity or paternity leave, labor management dispute job training, or other family or personal reasons, whether or not they were paid for the time off or were seeking other jobs. Each employed person is counted only once, even if he or she holds more than one job.

Unemployed persons: All persons who had no employment during the reference week, were available for work, except for temporary illness, and had made specific efforts to find employment some time during the 4-week period ending with the reference week. Persons who were waiting to be recalled to a job from which they had been laid off need not have been looking for work to be classified as unemployed.

Unemployment rate: The ratio of unemployed to the civilian labor force expressed as a percent.

Seasonal adjustment: A statistical technique that eliminates the influences of weather, holidays, the opening and closing of schools, and other recurring seasonal events from economic time series. This permits easier observation and analysis of cyclical, trend, and other nonseasonal movements in the data.
