## Press Release

### **Maryland Adds 11,700 Private Sector Jobs in June and the Unemployment Rate Drops to 4.3%**

*Since January 2015, Maryland gained 74,100 jobs*

**BALTIMORE, MD (July 22, 2016)** – The U.S. Department of Labor’s Bureau of Labor Statistics (BLS) released state jobs and unemployment data earlier today. According to the preliminary survey data, Maryland added 9,800 total jobs over-the-month. The private sector added 11,700 jobs. Five months in 2016 have posted over-the-month job gains. Maryland’s preliminary jobs estimate for May was revised by BLS from a gain of 2,500 to a loss of 200 jobs.

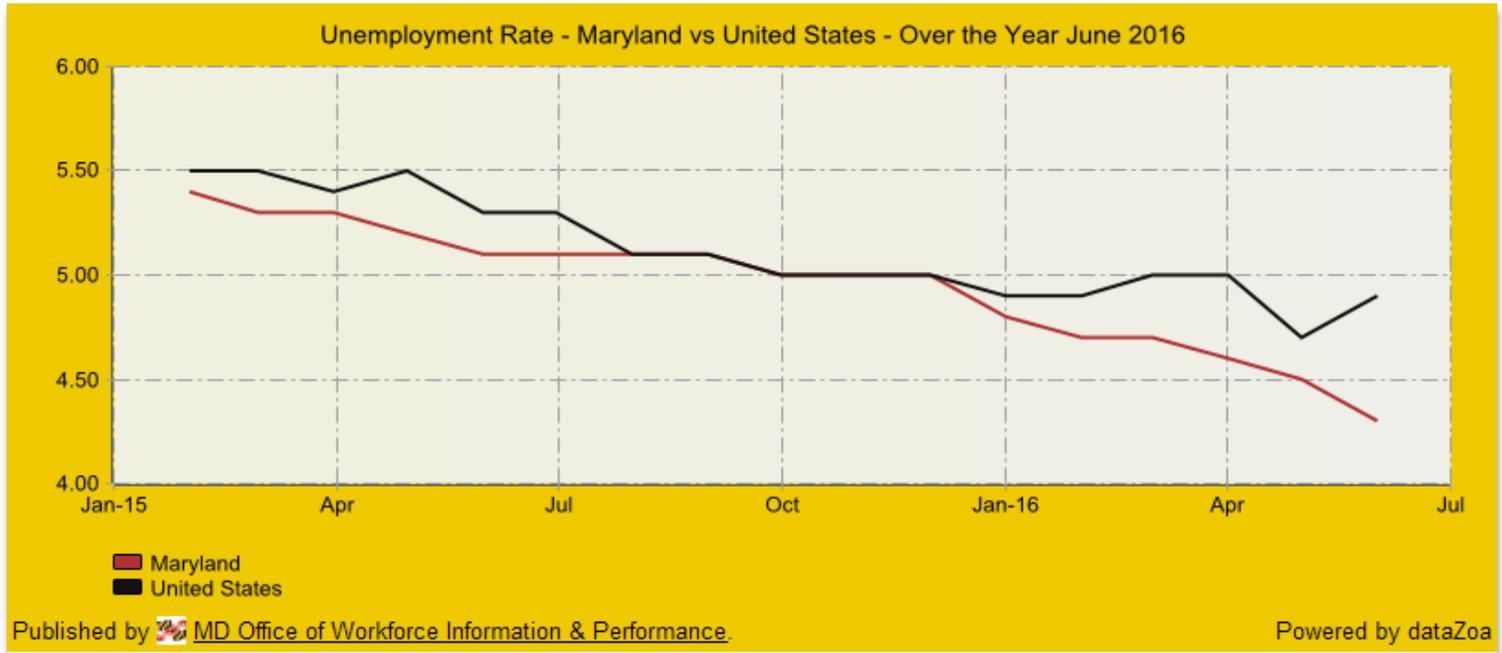

Maryland's June unemployment rate dropped to 4.3 percent from the May rate of 4.5 percent.

“Since day one, our administration has been committed to strengthening the economy and putting hard-working Marylanders back to work,” said Governor Hogan. “The continued rapid growth of jobs in our state underscores our ongoing efforts to make Maryland more business friendly and create new opportunities for our citizens.”

"Maryland businesses have created more than 11,000 jobs in June which includes gains in manufacturing," said Maryland Labor Secretary Kelly M. Schulz. "The Maryland Department of Labor is focused on addressing the needs of local businesses through our collaborative and comprehensive employment and training services designed to prepare Marylanders to be successful in the workforce."

According to the data released today, the Leisure and Hospitality sector increased by 6,100 jobs. (Arts, Entertainment, and Recreation subsector increased by 3,100 jobs and the Accommodation and Food Services subsector increased by 3,000 jobs.) The Information sector increased by 2,900 jobs. The Professional and Business Services sector increased by 2,600 jobs. (The Administrative and Support and Waste Management and Remediation Services subsector increased by 3,200 jobs and the Professional, Scientific, and Technical Services subsector decreased by 600 jobs.) The Trade, Transportation, and Utilities sector increased by 1,700 jobs. (The Retail Trade subsector increased by 900 jobs, the Wholesale Trade subsector increased by 500 jobs and the Transportation, Warehousing, and Utilities subsector increased by 300 jobs.) The Manufacturing sector increased by 300 jobs (The Non-Durable Goods subsector increased by 400 jobs and the Durable Goods subsector decreased by 100 jobs.) The Mining, Logging and Construction sector increased by 100 jobs.

## Business News

### **8,000 Baltimore youth employed through summer program**

According to the Baltimore Sun, Some 6,000 Baltimore youths started work Monday as part of the city's YouthWorks summer program.

The five-week employment program gives people ages 14 to 21 opportunities to work in industries such as finance, law, government, health care and tourism. Another five-week session, scheduled to begin July 11, will increase the number of young people employed to around 8,000, according to the Mayor's Office of Employment Development.

### **Taylor Farms to add 150 jobs in Howard County**

According to the Baltimore Sun, Howard County-based Taylor Farms will add 150 jobs to expand its produce packaging and distribution operations.

The company, which grows and packages salad mixes and healthy snacks, has had manufacturing operations in Annapolis Junction since 2004 and employs nearly 500 workers in the state.

### **Accenture Federal Services will double workforce as it opens innovation center in Woodlawn**

According to Baltimore Sun, Accenture Federal Services, a Virginia subsidiary of the global professional services firm Accenture, opened a technology-focused innovation center Monday in Woodlawn that will more than double its workforce to 300 people in the coming years.

The Innovation Center for Technology will focus on information technology work for Accenture's federal clients, including Woodlawn-based Social Security Administration and the Centers for Medicare and Medicaid Services. About 160 people are now based at the center and Accenture plans to at least double that number as demand grows for its technology services.

## Glossary of Terms

**Nonagricultural payroll employment:** Employment data referring to persons on establishment payrolls who receive pay for any part of the pay period which includes the 12th of the month. Persons are counted at their place of work rather than at their place of residence; those appearing on more than one payroll are counted on each payroll. Establishments are classified in an industry on the basis of their principal product or activity in accordance with the most recent North American Industry Classification System Manual.

**Civilian labor force:** All persons 16 years and over in the civilian noninstitutional population classified as either employed or unemployed.

**Employed persons:** All persons who, during the reference week (the week including the 12th day of the month), (a) did any work as paid employees, worked in their own business or profession or on their own farm, or worked 15 hours or more as unpaid workers in an enterprise operated by a member of their family, or (b) were not working but who had jobs from which they were temporarily absent because of vacation, illness, bad weather, childcare problems, maternity or paternity leave, labor-management dispute job training, or other family or personal reasons, whether or not they were paid for the time off or were seeking other jobs. Each employed person is counted only once, even if he or she holds more than one job.

**Unemployed persons:** All persons who had no employment during the reference week, were available for work, except for temporary illness, and had made specific efforts to find employment some time during the 4-week period ending with the reference week. Persons who were waiting to be recalled to a job from which they had been laid off need not have been looking for work to be classified as unemployed.

**Unemployment rate:** The ratio of unemployed to the civilian labor force expressed as a percent.

**Seasonal adjustment:** A statistical technique that eliminates the influences of weather, holidays, the opening and closing of schools, and other recurring seasonal events from economic time series. This permits easier observation and analysis of cyclical, trend, and other nonseasonal movements in the data.
