## Press Release

### Maryland Adds 10,800 Jobs in October

*Since January, Maryland gained 43,200*

**BALTIMORE, MD (November 20, 2015)** – The U.S. Department of Labor's Bureau of Labor Statistics (BLS) released state jobs and unemployment data earlier today. According to the preliminary survey data, Maryland added 10,800 total jobs over-the-month. Maryland's private sector added 12,500 jobs over-the-month. Maryland has recorded jobs gains in seven out of 10 months in 2015. Please note that Maryland's preliminary jobs estimate for September was revised by BLS from a loss of 4,000 jobs to a loss of 300 jobs.

The Maryland October preliminary unemployment rate remained steady at 5.1 percent (September revised).

"The upward trend in jobs and growth in business creation shows that Maryland's economy is improving and stabilizing. It also indicates greater confidence in this Administration's economic development policies as a driver of job creation. It's an indication of confidence in the economy and the direction it's going in—we're seeing that potential employers are feeling more confident about opening a business here in Maryland, than they have in the past," said Governor Larry Hogan.

"I am proud to announce that as of October, Maryland now has almost 7,000 more businesses than we had in 2011, the low point for business creation in the State. As the number of Maryland employers continues to rise, it's clear that that Maryland is 'open for business,'" said Kelly M. Schulz, Secretary of the Maryland Department of Labor, Licensing and Regulation.

According to data released today, the Mining, Logging, and Construction sector added 1,700 jobs mainly attributable to building construction. The Manufacturing sector gained 1,800 jobs. (The Durable goods subsector added 500 jobs and the Non-Durable goods subsector gained 1,300 jobs. Gains in the Non-Durable Goods subsector were seen in food manufacturing businesses and gains in the printing and related support activities subsector.) The Trade, Transportation and Utilities sector added 2,700 jobs. (The Transportation, Warehousing, and Utilities subsector gained 500 jobs. The Wholesale Trade subsector added 200 jobs and the Retail Trade subsector gained 2,000 jobs, attributed to clothing and clothing accessory stores and sporting goods, hobby and musical Instrument shops.)

## Glossary of Terms

**Nonagricultural payroll employment:** Employment data referring to persons on establishment payrolls who receive pay for any part of the pay period which includes the 12th of the month. Persons are counted at their place of work rather than at their place of residence; those appearing on more than one payroll are counted on each payroll. Establishments are classified in an industry on the basis of their principal product or activity in accordance with the most recent North American Industry Classification System Manual.

**Civilian labor force:** All persons 16 years and over in the civilian noninstitutional population classified as either employed or unemployed.

**Employed persons:** All persons who, during the reference week (the week including the 12th day of the month), (a) did any work as paid employees, worked in their own business or profession or on their own farm, or worked 15 hours or more as unpaid workers in an enterprise operated by a member of their family, or (b) were not working but who had jobs from which they were temporarily absent because of vacation, illness, bad weather, childcare problems, maternity or paternity leave, labor-management dispute job training, or other family or personal reasons, whether or not they were paid for the time off or were seeking other jobs. Each employed person is counted only once, even if he or she holds more than one job.

**Unemployed persons:** All persons who had no employment during the reference week, were available for work, except for temporary illness, and had made specific efforts to find employment some time during the 4-week period ending with the reference week. Persons who were waiting to be recalled to a job from which they had been laid off need not have been looking for work to be classified as unemployed.

**Unemployment rate:** The ratio of unemployed to the civilian labor force expressed as a percent.

**Seasonal adjustment:** A statistical technique that eliminates the influences of weather, holidays, the opening and closing of schools, and other recurring seasonal events from economic time series. This permits easier observation and analysis of cyclical, trend, and other nonseasonal movements in the data.
